BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

IMAGES ARE BEST AVAILABLE COPY.

**As rescanning documents *will not* correct images,
please do not report the images to the
Image Problem Mailbox.**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A game apparatus comprising:
an image generation section for generating a space image of an object space, viewed from a virtual camera;
a blurring section for blurring an object first image of a predetermined object of objects in the object space, according to a distance from a predetermined position to the predetermined object in the object space, to generate a blurred object second image, wherein the predetermined object comprises an objective target having at least one target surface that expresses a target of the predetermined object, and an objective foundation that expresses a foundation of the target according to a background of the predetermined object, and wherein the blurring section blurs an image of the objective target to bring an image of the objective foundation into view; and
an execution section for executing a predetermined game by displaying the space image including the blurred object second image on a display section.
2. (Canceled)
3. (Original) A game apparatus as claimed in claim 1,
wherein the predetermined object the object first image of which is blurred by the blurring section is determined from the objects in the object space, according to a progress of the predetermined game executed by the execution section.
4. (Original) A game apparatus as claimed in claim 1,
wherein the predetermined position is a location of the virtual camera.
5. (Original) A game apparatus as claimed in claim 4,
wherein the blurring section blurs the object first image of the predetermined object, according to a sight line angle of the virtual camera to the predetermined object.

6. (Original) A game apparatus as claimed in claim 1, further comprising:
a setting section for setting a fixation point as the predetermined position, according to
a progress of the predetermined game executed by the execution section.

7. (Original) A game apparatus as claimed in claim 1,
wherein the predetermined game is a racing game, and
the blurring section blurs an object image on a racing course of the racing game.

8. (Original) A game apparatus as claimed in claim 1,
wherein the blurring section blurs an object image of an object processed by an anti-
aliasing, a mip mapping or a level of detail processing, of the objects in the object space.

9. (Original) A game apparatus as claimed in claim 1,
wherein the blurring section carries out an image composition processing to the
predetermined object as a transparency of the predetermined object is changed.

10. (Currently Amended) A game apparatus ~~as claimed in claim 1, comprising:~~
an image generation section for generating a space image of an object space, viewed
from a virtual camera;
a blurring section for blurring an object first image of a predetermined object of
objects in the object space, according to a distance from a predetermined position to the
predetermined object in the object space, to generate a blurred object second image; and
an execution section for executing a predetermined game by displaying the space
image including the blurred object second image on a display section;
wherein the predetermined object comprises a first object for expressing that expresses
a foundation and a second object for expressing that expresses a surface layer having at least
one surface on the first object; and
the blurring section blurs the second object to bring the first object into appear view.

11. (Currently Amended) A storage medium having a computer-executable program recorded thereon, wherein the program comprises:

~~a program code of~~instructions for generating a space image of an object space, viewed from a virtual camera;

~~a program code of~~instructions for blurring an object first image of a predetermined object of objects in the object space, according to a distance from a predetermined position to the predetermined object in the object space, to generate a blurred object second image;

instructions for expressing a target of the predetermined object;

instructions for expressing a foundation of the target, according to a background of the predetermined object;

instructions for expressing the predetermined object having the target and the foundation;

instructions for blurring an image of the target to bring an image of the foundation into view; and

~~a program code~~instructions for of executing a predetermined game by displaying the space image including the blurred object second image on a display section.

12. (Canceled)

13. (Currently Amended) A storage medium having a computer-executable program recorded thereon, as claimed in claim 11, wherein the program further comprises:

~~a program code of~~instructions for determining the predetermined object the object first image of which is blurred from the objects in the object space, according to a progress of the predetermined game.

14. (Currently Amended) A storage medium having a computer-executable program recorded thereon, as claimed in claim 11, wherein the program further comprises:

~~a program code of instructions for~~ setting a location of the virtual camera as the predetermined position.

15. (Currently Amended) A storage medium having a computer-executable program recorded thereon, as claimed in claim 14, wherein the program further comprises:

~~a program code of instructions for~~ blurring the object first image of the predetermined object, according to a sight line angle of the virtual camera to the predetermined object.

16. (Currently Amended) A storage medium having a computer-executable program recorded thereon, as claimed in claim 11, wherein the program further comprises:

~~a program code of instructions for~~ setting a fixation point as the predetermined position, according to a progress of the predetermined game.

17. (Currently Amended) A storage medium having a computer-executable program recorded thereon, as claimed in claim 11, wherein the program further comprises:

~~a program code of instructions for~~ blurring an object image on a racing course of a racing game as the predetermined game.

18. (Currently Amended) A storage medium having a computer-executable program recorded thereon, as claimed in claim 11, wherein the program further comprises:

~~a program code of instructions for~~ blurring an object image of an object processed by an anti-aliasing, a mip mapping or a level of detail processing, of the objects in the object space.

19. (Currently Amended) A storage medium having a computer-executable program recorded thereon, as claimed in claim 11, wherein the program further comprises:

~~a program code of instructions for~~ carrying out an image composition processing to the predetermined object as a transparency of the predetermined object is changed.

20. (Currently Amended) A storage medium having a computer-executable program recorded thereon, ~~as claimed in claim 11,~~ wherein the program further comprises:

instructions for generating a space image of an object space, viewed from a virtual camera;

instructions for blurring an object first image of a predetermined object of objects in the object space, according to a distance from a predetermined position to the predetermined object in the object space, to generate a blurred object second image;

~~a program code of~~instructions for expressing a foundation of the predetermined object;

~~a program code of~~instructions for expressing a surface layer having at least one surface on the foundation, of the predetermined object;

~~a program code of~~instructions for expressing the predetermined object having the foundation and the surface layer;~~and~~

~~a program code~~instructions for blurring the surface layer to bring the foundation into ~~appear~~view; and

instructions for executing a predetermined game by displaying the space image including the blurred object second image on a display section.

21. (Currently Amended) A computer program comprising ~~program code~~
~~means~~instructions for performing the steps of:

generating a space image of an object space, viewed from a virtual camera;

blurring an object first image of a predetermined object of objects in the object space, according to a distance from a predetermined position to the predetermined object in the object space, to generate a blurred object second image; ~~and~~

expressing a target of the predetermined object;

expressing a foundation of the target, according to a background of the predetermined object;

expressing the predetermined object having the target and the foundation;

blurring an image of the target to bring an image of the foundation into view; and
executing a predetermined game by displaying the space image including the blurred
object second image on a display section.

22. (Canceled)

23. (Currently Amended) A computer program as claimed in claim 21, further
comprising ~~program code means~~instructions for performing the step of: determining the
predetermined object the object first image of which is blurred from the objects in the object
space, according to a progress of the predetermined game.

24. (Currently Amended) A computer program as claimed in claim 21, further
comprising ~~program code means~~instructions for performing the step of: setting a location of
the virtual camera as the predetermined position.

25. (Currently Amended) A computer program as claimed in claim 24, further
comprising ~~program code means~~instructions for performing the step of: blurring the object
first image of the predetermined object, according to a sight line angle of the virtual camera to
the predetermined object.

26. (Currently Amended) A computer program as claimed in claim 21, further
comprising ~~program code means~~instructions for performing the step of: setting a fixation
point as the predetermined position, according to a progress of the predetermined game.

27. (Currently Amended) A computer program as claimed in claim 21, further
comprising ~~program code means~~instructions for performing the step of: blurring an object
image of a racing course on a racing game as the predetermined game.

28. (Currently Amended) A computer program as claimed in claim 21, further
comprising ~~program code means~~instructions for performing the step of: blurring an object
image of an object processed by an anti-aliasing, a mip mapping or a level of detail
processing, of the objects in the object space.

29. (Currently Amended) A computer program as claimed in claim 21, further comprising ~~program code means~~instructions for performing the step of: carrying out an image composition processing to the predetermined object as a transparency of the predetermined object is changed.

30. (Currently Amended) A computer program ~~as claimed in claim 21, further~~ comprising ~~program code means~~instructions for performing the steps of:

generating a space image of an object space, viewed from a virtual camera;
blurring an object first image of a predetermined object of objects in the object space, according to a distance from a predetermined position to the predetermined object in the object space, to generate a blurred object second image;
expressing a foundation of the predetermined object;
expressing a surface layer having at least one surface on the foundation, of the predetermined object;
expressing the predetermined object having the foundation and the surface layer; and
blurring the surface layer to bring the foundation into ~~appear~~view; and
executing a predetermined game by displaying the space image including the blurred object second image on a display section.
